

JOEL MAURICE LOMNICK, EIT
Richmond, Virginia

|

Electrical Engineer | Community Builder | Creative Strategist | Fraternal Leader | Mentor | Author

MASTER PROFESSIONAL RESUME

PROFESSIONAL SUMMARY

Joel Maurice Lomnick is an Electrical Engineer-in-Training, project engineer, creative strategist, community mentor, fraternity leader, church media servant, writer, cultural arts participant, and multidisciplinary builder based in Richmond, Virginia. His professional identity blends technical electrical engineering, building systems design, project coordination, nonprofit leadership, Black Greek-letter organization leadership, digital media, cultural storytelling, mentoring, and entrepreneurial service.

Joel brings more than two decades of experience across electrical engineering, power distribution, low-voltage systems, construction coordination, building design, project management, community programming, website development, graphic design, youth mentoring, public speaking, African drum and dance, line dancing, real estate learning, nonprofit support, and leadership development. His career began with formal engineering training at the Rochester Institute of Technology and evolved through professional roles in consulting engineering, building systems design, project coordination, church and community technology, fraternity operations, and creative consulting.

He is currently a Project Engineer II / Electrical Engineer at Stratus, formerly Ascent Engineering Group, where he supports K-12 education, public-sector, institutional, and community-centered projects involving electrical power distribution, lighting, fire alarm coordination, low-voltage systems, service coordination, metering, code compliance, design documentation, construction administration, utility coordination, submittal review, RFI responses, punch list support, and multidisciplinary project coordination.

Outside of formal employment, Joel is the founder of Lomnick Professional Services, also known as LomnickPro, a creative and strategic services platform focused on branding, web design, visual communication, digital presence, presentation development, community storytelling, and practical project support for nonprofits, churches, fraternities, entrepreneurs, and grassroots organizations. He is also associated with Olunirun Enterprises LLC as part of his broader entrepreneurial, creative, and professional-service vision.

Joel's leadership life includes service through the National Society of Black Engineers, Iota Phi Theta Fraternity, Incorporated, the National Pan-Hellenic Council of Metro Richmond, Third Street Bethel AME Church, Break It Down RVA, African drum and dance communities, mentoring programs, and professional development work for younger men and emerging leaders. He has served as Vice Polaris of the Omicron Omega Chapter of Iota Phi Theta Fraternity, chapter webmaster and branding strategist, intake leader, undergraduate advisor, NPHC-MR webmaster, church media leader, trustee, internal audit chair, young men's mentoring co-leader, public speaker, workshop facilitator, and creative advisor.

His professional brand is rooted in systems thinking, cultural awareness, technical problem solving, visual communication, faith-rooted service, mentorship, and legacy building. He is especially effective where complex technical work, human development, public trust, and communication intersect.

CORE PROFESSIONAL IDENTITY

Electrical Engineering and Building Systems

Power distribution, electrical service coordination, panel schedules, risers, lighting, lighting controls, fire alarm coordination, branch circuitry, equipment connections, grounding, metering, low-voltage coordination, utility coordination, NEC-based review, construction administration, RFI responses, submittal review, field observation, punch list documentation, interdisciplinary coordination, and owner/architect/contractor communication.

Project Engineering and Construction Coordination

K–12 education facilities, public-sector renovations, institutional buildings, faith-based facilities, renovation projects, utility service upgrades, electrical load evaluation, design narratives, scope clarification, project meetings, discipline coordination, field documentation, owner communication, contractor response drafting, and practical problem solving during design and construction.

Leadership and Organizational Development

Fraternity operations, executive council leadership, committee coordination, succession planning, leadership training, mentoring, chapter branding, NPHC diplomacy, intake compliance support, young professional development, undergraduate advising, volunteer coordination, event planning, meeting facilitation, strategic planning, accountability systems, and culture-building.

Creative Strategy and Digital Media

Website design, Wix and Canva website planning, graphic design, event flyers, social media content, brand systems, chapter websites, nonprofit websites, church media graphics, slide decks, resumes, cover letters, professional bios, digital storytelling, content strategy, presentation design, and visual identity development.

Mentoring, Coaching, and Youth Development

Young men's mentoring, STEM exposure, NSBE leadership, résumé and LinkedIn coaching, career encouragement, emotional intelligence, brotherhood development, public speaking coaching, personal branding, academic support, professional development, and life-skills mentorship for young men and emerging professionals.

Cultural Arts and Community Engagement

West African drum and dance, line dancing, gospel music, church media, community events, Juneteenth programming, cultural storytelling, fraternity stroll/step culture, public performance, community wellness, and movement-based healing.

Writing and Storytelling

Author of *Lionheart: The Joel Lomnick Story*, autobiographical writing, memoir development, personal narrative, motivational writing, faith-based reflection, leadership messaging, chapter history writing, community storytelling, and identity-centered creative nonfiction.

EDUCATION

Rochester Institute of Technology — Rochester, NY

Bachelor of Science, Electrical Engineering, 2005

Relevant emphasis: electrical systems, circuits, power, engineering design, technical communication, project-based engineering, STEM outreach, and applied problem solving.

Hudson Valley Community College — Troy, NY

Associate of Science, Business Administration, 2013

Relevant emphasis: business planning, management, operations, accounting basics, entrepreneurship, organizational structure, and practical business development.

San Joaquin Community College

Associate of Science, Construction Management, 2018

Relevant emphasis: construction process, project management, estimating, scheduling, construction documentation, coordination, and construction industry fundamentals.

Professional Credential

Engineer-in-Training / EIT

Pursuing Professional Engineer licensure in Electrical Power.

TECHNICAL SKILLS

Electrical Engineering

Power distribution systems; lighting and lighting controls; branch circuiting; panelboards; transformers; switchboards; service equipment; feeders; grounding; disconnects; motor and equipment connections; electrical load review; short-circuit and coordination awareness; arc-flash labeling coordination; emergency power coordination; utility service coordination; electrical demolition and renovation planning; construction phase services.

Codes and Standards

National Electrical Code review; NFPA coordination; commercial and institutional electrical design standards; utility coordination requirements; owner design guidelines; K-12 standards; fire alarm and low-voltage coordination; accessibility and mounting-height coordination as related to electrical systems.

Project Delivery

Design development; construction documents; schematic narratives; field verification; site observation; RFI responses; submittal review; owner coordination; architectural coordination; mechanical/plumbing coordination; technology/security coordination; contractor communication; meeting notes; issue tracking; punch lists; scope narratives.

Software and Platforms

AutoCAD; Revit exposure / BIM coordination; Microsoft Office; Microsoft Word; Excel; PowerPoint; Outlook; Teams; Bluebeam-style PDF markup workflows; Canva; Wix; Google Workspace; Dropbox; Gmail; social media management platforms; website builders; digital media and presentation tools.

Creative and Communication Tools

Canva Pro; Wix; graphic layout; flyer design; website mockups; social content planning; brand identity development; resume and cover letter writing; professional bio writing; presentation decks; meeting agendas; minutes; newsletters; event guides; church livestream graphics; community-facing communications.

PROFESSIONAL EXPERIENCE

STRATUS / ASCENT ENGINEERING GROUP — Richmond, VA

Project Engineer II / Electrical Engineer / EIT

September 2022–Present

Serve as a project engineer and electrical designer supporting K–12 education, public-sector, institutional, and renovation projects across Virginia and surrounding jurisdictions. Work includes electrical design, project coordination, documentation, construction administration, and client/team support.

Representative responsibilities and achievements:

Develop electrical design documentation for building renovation and new-work projects, including power distribution, lighting, lighting controls, fire alarm coordination, low-voltage pathways, equipment connections, panelboard coordination, and demolition/new-work scope.

Support project managers and architects with practical electrical design input, owner coordination, existing-condition review, and decision-making on service, equipment, and infrastructure impacts.

Prepare and revise electrical drawings, narratives, meeting notes, risers, panel coordination, scope descriptions, and issue summaries for active design and construction projects.

Coordinate with mechanical, plumbing, architectural, structural, civil, technology, security, and owner teams to resolve interdisciplinary conflicts and confirm electrical impacts.

Review RFIs, submittals, field photos, record drawings, as-builts, manufacturer data, and contractor questions to produce clear, defensible responses.

Support K–12 school projects involving metering systems, PV coordination, service impacts, mechanical equipment changes, access control, fire alarm, data, security, lighting, and renovation of occupied school facilities.

Assist with utility coordination, including service requirements, load documentation, NOVEC/Dominion-style coordination questions, commercial service impacts, and new or modified service concepts.

Translate technically dense electrical issues into plain-language updates for project managers, architects, owners, and internal team members.

Prepare meeting notes and project summaries that identify decisions, action items, risks, owner impacts, and follow-up requirements.

Support construction administration through submittal reviews, RFI responses, punch list observations, and field coordination.

Maintain professional focus on clear communication, practical problem-solving, code awareness, constructability, and owner trust.

Representative project themes:

K–12 school electrical renovations and additions
Public school metering and energy monitoring coordination
PV system and utility interconnection coordination
Welding lab electrical service upgrades and load studies
Police station renovation scope development

Fire alarm, access control, data, and low-voltage coordination
School kitchen, gym, fitness, media center, and classroom renovation support
Existing building survey and field documentation
Electrical demolition and new-work coordination
Utility service planning and owner impact summaries

ASCENT ENGINEERING GROUP — Richmond, VA
Electrical Engineer / Project Engineer
Prior to Stratus merger / transition

Contributed to electrical engineering and building systems design for educational, commercial, public, and community-focused facilities. Supported electrical design production, coordination, project documentation, and construction-phase services.

Representative responsibilities:

Designed and coordinated electrical systems for new construction and renovation projects.

Reviewed owner standards, project requirements, existing conditions, equipment schedules, and interdisciplinary design impacts.

Supported engineering documentation for power, lighting, fire alarm, telecommunications pathways, and equipment connections.

Participated in project meetings, site visits, construction administration, and interdisciplinary coordination.

Built a reputation for being a translator between technical design and practical project execution.

BFPE INTERNATIONAL / FIRE PROTECTION AND LIFE SAFETY EXPERIENCE — Richmond, VA
Electrical / Fire Protection / Life Safety Support
Approx. 2010s

Supported technical work tied to fire alarm, life safety, inspection, design, or related building systems coordination. Built practical understanding of fire alarm systems, code-driven documentation, construction coordination, and field realities.

Representative responsibilities:

Supported fire alarm / life safety documentation and coordination.

Developed stronger understanding of how code compliance, field conditions, owner requirements, and contractor execution intersect.

Strengthened ability to review existing conditions and translate them into workable technical solutions.

PROGRESSIVE DESIGN / FASTRAC / RELATED RICHMOND-AREA ENGINEERING ROLES — Richmond, VA
Electrical Engineering / Design / Project Support
Approx. 2014–2022

Worked in Richmond-area engineering and design environments while continuing to build electrical design, construction coordination, and project delivery experience.

Representative responsibilities:

Supported electrical design and project documentation.

Coordinated with architects, engineers, contractors, and owners.

Gained experience in consulting, renovation work, client communication, technical deliverables, and schedule-driven project production.

2RW CONSULTANTS — Charlottesville / Richmond, VA
Electrical Engineering / Building Systems Design
Approx. 2014–2016

Joined 2RW Consultants after relocating to Virginia and rebuilding professionally in Richmond. Supported electrical and building systems design while commuting between Richmond and Charlottesville.

Representative responsibilities:

Developed electrical design documents for building projects.

Supported low-voltage and power coordination.

Built experience in Virginia building design, client coordination, and multidisciplinary project workflows.

Strengthened professional resilience, adaptability, and design production discipline during a major life and geographic transition.

M+W GROUP / EXYTE — Albany, NY
Electrical / Project Engineering Support
Approx. 2009–2014

Worked in a technical corporate engineering environment supporting electrical design, project coordination, and engineering documentation. Continued developing as a Black electrical engineer in complex professional environments while pursuing additional education and community leadership.

Representative responsibilities:

Supported electrical engineering design and project documentation.

Worked in structured corporate engineering environments requiring technical accuracy, documentation discipline, and multidisciplinary coordination.

Passed or held EIT credential during this broader period of professional development.

Balanced engineering responsibilities with business education, church leadership, mentoring, music management, African drum and dance instruction, and Iota Phi Theta leadership.

M/E ENGINEERING — Albany / Rochester, NY
Electrical Engineering Support
Approx. 2007–2009

Worked in consulting engineering while transitioning from Rochester to the Capital District. Supported design and project coordination work while navigating early-career development and family responsibilities.

Representative responsibilities:

Supported electrical building systems documentation.

Developed experience in consulting engineering workflows.

Maintained professional continuity while balancing significant family and personal responsibilities.

IBC ENGINEERING / HARRIS RF COMMUNICATIONS / OPTIMATION TECHNOLOGY — Rochester, NY
Early Electrical Engineering / Technical Roles
Approx. 2005–2007

Began professional engineering career after completing the B.S. in Electrical Engineering at RIT. Worked in early-career technical and engineering environments while supporting family and developing practical engineering judgment.

Representative responsibilities:

Supported technical design, documentation, engineering coordination, and applied problem solving.

Built early career experience in engineering firms and technical environments.

Learned the difference between academic engineering and practical workplace engineering.

Developed professional communication, discipline, troubleshooting habits, and technical humility.

EARLY FOUNDATION EXPERIENCE

McDonald's — Rochester, NY
Crew / Customer Service / Operations Support
High School Years

Built early work ethic, customer service ability, teamwork, speed, accountability, and resilience in a fast-paced environment.

Miss Ann's Daycare / Childcare Support — Rochester, NY
Childcare Support
High School Years

Developed patience, responsibility, communication, mentoring instincts, and early experience supporting children and families.

ENTREPRENEURIAL AND CONSULTING EXPERIENCE

LOMNICK PROFESSIONAL SERVICES / LOMNICKPRO — Richmond, VA
Founder / Creative Strategist / Website and Graphic Designer / Consultant
2014–Present

Founded and developed Lomnick Professional Services, also known as LomnickPro, as a creative and strategic service platform supporting nonprofits, churches, fraternities, entrepreneurs, community groups, and individuals who need polished, professional, culturally aware digital and visual communication.

LomnickPro exists to help mission-driven people and organizations turn rough ideas into visible, professional, usable materials. The work combines engineering logic, visual storytelling, brand strategy, digital tools, and community awareness.

Services include:

- Website design and redesign
- Wix website development
- Canva website planning
- Graphic design
- Flyers and promotional materials
- Brand identity and visual systems
- Social media graphics and templates
- Business cards and digital collateral
- Slide decks and presentation support
- Resume and cover letter development
- Professional bios and personal branding
- Event branding
- Community campaign materials
- Project planning and consulting
- Cost estimation and scheduling support
- 3D building modeling concepts
- Strategy sessions for entrepreneurs and organizations

Representative portfolio and project themes:

- Omicron Omega Chapter of Iota Phi Theta Fraternity, Inc. website and branding support
- Theta Omicron Chapter of Iota Phi Theta Fraternity, Inc. website support
- National Pan-Hellenic Council of Metro Richmond website support
- Cathy Lomnick Sepsis Foundation website support
- Frills & Finds Consignment website support
- Church flyers, worship graphics, media ministry visuals, and trustee presentations
- Mentoring program flyers, event announcements, and youth development graphics
- NPHC, fraternity, and community service promotional materials
- Juneteenth, lupus awareness, scholarship, community service, and cultural event graphics
- Resume and portfolio support for young professionals and mentees

Core LomnickPro value:

Translates community vision into professional visibility.

Helps Black-led organizations, churches, fraternities, small businesses, and grassroots leaders present themselves with clarity, dignity, and polish.

Combines design, storytelling, strategy, project management, and mentorship.

OLUNIRUN ENTERPRISES LLC — Richmond, VA

Founder / Entrepreneurial Platform

Dates to Confirm

Developing entrepreneurial platform connected to Joel's broader professional, creative, consulting, and community-building work. Intended to support long-term business activity across professional services, creative strategy, consulting, real estate learning, cultural work, and legacy-building initiatives.

Current resume framing:

Entrepreneurial platform supporting creative services, professional consulting, community-building, brand development, and future business ventures.

Use this section as a placeholder until formal business scope, registration details, and service categories are finalized for public use.

REAL ESTATE EXPERIENCE AND INVESTOR EDUCATION

Greater Richmond Real Estate Investors Association / Real Estate Learning / JML Properties Concepts

Richmond, VA and Rochester, NY

Approx. 2010s–Present

Developed practical interest and working knowledge in real estate investing, wholesaling concepts, property research, housing markets, investor networking, and single-family property opportunities in Richmond and Rochester.

Experience includes:

Real estate investor networking.

Learning wholesaling and property acquisition concepts.

Studying Richmond and Rochester housing markets.

Developing an understanding of investor communication, property evaluation, neighborhood context, and financial risk.

Exploring how real estate can connect to community stability, generational wealth, housing access, and entrepreneurial growth.

Applying project management, construction management education, and engineering thinking to property-related analysis.

COMMUNITY LEADERSHIP AND SERVICE

IOTA PHI THETA FRATERNITY, INCORPORATED

Omicron Omega Chapter — Richmond, VA

Vice Polaris / Chapter Leader / Webmaster / Branding Strategist / Intake Leader / Advisor

2016–Present

Brother initiated July 9, 2011, Pi Omega Chapter, New York City

Serves as a leading chapter strategist, operator, mentor, and builder within Iota Phi Theta Fraternity, Incorporated. Joel's Iota leadership reflects the fraternity's five principles: Scholarship, Leadership, Citizenship, Fidelity, and Brotherhood.

Key roles and service:

Vice Polaris, Omicron Omega Chapter, Richmond, VA

Former Chapter Secretary, Gamma Eta Omega Chapter

Chapter webmaster and digital strategist

NPHC-MR webmaster

Undergraduate chapter advisor / co-advisor for Virginia Union University Theta Omicron support

Support for Delta Lambda reactivation efforts at the University of Virginia

Intake leader / Dean / Assistant Dean experience

Leadership development and professional development support for younger brothers

Recruitment, interest meeting, and information session development

Chapter branding, flyer, website, and social media modernization

Meeting strategy, agenda development, minutes, recap, and planning support

NPHC-MR coordination and public-facing representation

Support for Iota, NPHC, community service, scholarship, and brotherhood events

Representative chapter-building contributions:

Revamped chapter digital presence through website, social media, flyers, presentations, and recruitment materials.

Built and maintained professional chapter branding to strengthen public credibility.

Supported Omicron Omega's transition from quiet local presence to visible, consistent, and community-facing chapter.

Helped design recruitment and intake-related presentations for VCU, VUU, and virtual platforms.

Led and supported intake efforts with focus on compliance, education, documentation, accountability, and future leadership development.

Mentored new brothers and Iota Bound Men into active chapter contributors.

Supported the PillarPhiX Summer 2025 line and its transition into chapter leadership participation.

Helped strengthen Omicron Omega Young Professionals by encouraging measurable contributions, professional development, and documentation culture.

Supported chapter communications, community service reporting, donation process improvements, website modernization, and public narrative development.

Helped frame chapter identity around past, present, and future: national Iota history, Eastern Region alignment, Virginia presence, Richmond chapter legacy, VUU/UVA advisory roles, and modern community impact.

Program and community impact themes:

Back-to-school supply drives
Iotas in the Park
St. Jude-related advocacy and service
NPHC-MR service and social action support
Youth mentoring
Scholarship promotion
VSU Endowment Fund awareness
Professional development for brothers
Resume and LinkedIn support
Public speaking and leadership coaching
Chapter history preservation
NPHC diplomacy and relationship protection
Iota 102 leadership education
Intake compliance and dean pipeline development

NATIONAL PAN-HELLENIC COUNCIL OF METRO RICHMOND

Webmaster / Digital Support / Iota Representative
Richmond, VA
Dates to Confirm–Present

Supports the digital presence and communication infrastructure of the NPHC of Metro Richmond while representing Iota Phi Theta Fraternity, Incorporated in a professional, cooperative, and relationship-centered manner.

Responsibilities and contributions:

Website support for NPHC-MR.

Digital communication support.

Promotion of NPHC unity, social action, service, and public visibility.

Support for council-wide events, announcements, and professional presentation.

Collaboration with Divine Nine chapters and leaders in the Richmond area.

Relationship-protective communication across organizational lines.

THIRD STREET BETHEL AME CHURCH — Richmond, VA

Media Ministry Leader / Trustee / Internal Audit Committee Chair / Young Men's Mentoring Co-Leader / Public Speaker

Approx. 2014–Present

Serves Third Street Bethel AME Church through media, governance, mentoring, technology, communications, stewardship, and leadership development.

Roles and contributions:

Media Team / Media Ministry leadership.

Livestream, worship media, presentation graphics, audio/visual coordination, and service support.

Trustee Board service.

Internal Audit Committee chair.

Co-leader of the Young Men's Mentoring Program with Johnathan Bennett.

Support for church events, reports, media guides, volunteer coordination, technology setup, and program logistics.

Speaker, encourager, mentor, and faith-rooted servant leader.

Representative accomplishments:

Helped modernize worship media and digital presentation workflows.

Supported online and hybrid worship functions, including Sunday service media needs.

Created or supported church flyers, media graphics, event guides, PowerPoint coordination, and communication materials.

Helped coordinate major church events, including programming expected to involve large attendance and multiple presenters.

Supported practical stewardship through audit-minded thinking, documentation, committee coordination, and accountability.

Mentored young men through faith, life skills, leadership, critical thinking, emotional intelligence, professional exposure, and personal development.

Integrated engineering, technology, communication, and ministry service into a single leadership contribution.

NATIONAL SOCIETY OF BLACK ENGINEERS — Rochester Institute of Technology
Academic Excellence Chair / Programs Chair / Vice President / STEM Mentor
Approx. 1999–2005

Served in multiple leadership roles within the RIT chapter of the National Society of Black Engineers. NSBE became a critical leadership, academic, cultural, and professional development platform during Joel's engineering education.

Roles and contributions:

Academic Excellence Chair.

Programs Chair.

Vice President.

STEM outreach leader.

Mentor to younger students.

Participant in conferences, workshops, and engineering development opportunities.

Contributions and impact:

Helped organize academic support, study culture, and engineering persistence efforts.

Supported STEM Days and outreach programming for Rochester-area students.

Helped create spaces where Black engineering students could be seen, supported, and pushed toward excellence.

Used public speaking, organizing, mentoring, and program development to support Black student success in engineering.

Integrated scholarship, service, and leadership before formally entering long-term professional and fraternity leadership.

YOUNG MEN'S MENTORING PROGRAM — Third Street Bethel AME Church

Co-Leader / Mentor / Program Builder

2018–Present

Co-leads mentoring efforts for young men through Third Street Bethel AME Church, focusing on leadership, personal development, academic success, faith, identity, decision-making, accountability, emotional intelligence, and practical life skills.

Areas of focus:

Academic encouragement.

Career exposure.

Personal discipline.

Emotional intelligence.

Faith and values.

Public speaking.

Confidence-building.

Professional identity.

Black male leadership.

Life skills.

Critical thinking.

Conflict navigation.

Mentoring philosophy:

Meet young men where they are.

Use plain language, real-life examples, humor, honesty, and accountability.

Teach both technical skills and emotional maturity.

Model a version of manhood that is strong, thoughtful, responsible, and compassionate.

BREAK IT DOWN RVA — Richmond, VA

Line Dance Participant / Ambassador / Community Member

Approx. 2020s–Present

Participates in and supports Richmond's line dance community through Break It Down RVA and related instructors and community events. Uses line dancing as a form of wellness, cultural expression, community connection, public joy, and movement-based healing.

Contributions and themes:

Community participation.

Event support.

Social media visibility.

Line dance promotion.

Black joy and wellness.

Intergenerational community engagement.

Cultural rhythm and movement.

Public representation of healthy, inclusive community participation.

AFRICAN DRUM AND DANCE EXPERIENCE

Bush Mango Drum & Dance Ensemble — Rochester, NY
Drummer / Performer / Cultural Arts Participant
Approx. 2003–2007

Participated in West African drum and dance performance and cultural arts work in Rochester. Developed grounding in rhythm, ensemble performance, cultural expression, and movement-based healing.

Bata con Pies — Rochester, NY
Drummer / Performer
Approx. 2000s

Participated in Afro-Cuban / African diasporic drum and dance expression, deepening rhythmic range, cultural appreciation, and performance discipline.

EBA Dance Theatre — Albany, NY
African Drum and Dance Instructor
Approx. 2008–2010

Taught African drum and dance in Albany, building on Rochester training and translating cultural arts experience into instruction, community engagement, and movement-based programming.

Troy African Dance & Fitness / Community Drum and Dance Instruction — Troy, NY
Instructor / Drummer / Community Arts Facilitator
Approx. 2013–2014

Taught or supported African dance and fitness sessions in Troy, helping create a culturally grounded, movement-focused community space.

Ezibu Muntu African Dance Company — Richmond, VA
Drummer / Performer / Cultural Arts Contributor
Approx. 2014–2019

Participated in Richmond's African dance and drum community through Ezibu Muntu, contributing rhythm, performance, rehearsal discipline, and cultural energy.

Akoma de Gado Drum & Dance Ensemble — Richmond, VA
Drummer / Performer / Instructor / Cultural Arts Contributor
Approx. 2019–2021

Supported cultural performance, community drumming, and African diasporic rhythm work through Akoma de Gado. Contributed to events, education, and community healing through drum and dance.

WRITING, STORYTELLING, AND PUBLIC SPEAKING

Lionheart: The Joel Lomnick Story
Author / Memoirist / Storyteller
2025–Present

Author of Lionheart: The Joel Lomnick Story, an autobiographical work exploring family, faith, trauma, engineering, Black identity, church, NSBE, Iota Phi Theta, African drum and dance, sexuality, mentorship, grief, resilience, entrepreneurship, and reinvention.

Writing themes:

Personal testimony.

Black male identity.

Faith and church life.

Engineering survival.

NSBE and STEM persistence.

Iota Phi Theta brotherhood.

AME church leadership.

Cultural arts and rhythm.

Mentorship.

Grief and healing.

Leadership development.

Community building.

Self-improvement and legacy.

Public speaking and storytelling experience:

Church speaking and sermon development.

Fraternity leadership messaging.

Mentoring talks.

Professional development coaching.

Resume and career guidance.

Community event speaking.

RVA Lupus Empowerment Conference participation.

Leadership reflections for younger men and emerging professionals.

COLLEGE AND CAMPUS LEADERSHIP

ROCHESTER INSTITUTE OF TECHNOLOGY — Rochester, NY

Student Leader / Gospel Music Leader / Radio Host / STEM Mentor / Cultural Bridge Builder
1999–2005

While completing a Bachelor of Science in Electrical Engineering, Joel built a broad leadership record across STEM, gospel music, campus culture, radio, Deaf and hard-of-hearing community engagement, and student organizations.

Key involvement:

RIT Gospel Ensemble — president, percussionist, conductor/support leader, performer.

WTR 89.7 FM — gospel radio host for “The Answer.”

National Society of Black Engineers — Academic Excellence Chair, Programs Chair, Vice President.

Ebony Club — hearing ally and cultural participant with NTID Black Deaf and hard-of-hearing students.

RIT Step Team / R.I. Step — step master / choreographer / performer.

CSTEP / NACME — STEM support, leadership development, academic persistence, conference participation.

Project TEAK / Girl Scouts STEM outreach — circuit learning kits and STEM exposure.

ASL / NTID engagement — formal ASL learning and Deaf culture exposure.

Representative contributions:

Helped sustain Black student excellence and community in a predominantly white technical environment.

Used gospel music, radio, drumming, stepping, and STEM outreach as leadership platforms.

Supported STEM exposure for youth and underrepresented students.

Built bridges across hearing and Deaf communities through Ebony Club, ASL learning, and NTID cultural engagement.

Developed early public speaking, facilitation, mentoring, event planning, and technical education skills.

SELECTED PROJECT HIGHLIGHTS

Electrical Engineering and Building Systems Projects

K–12 electrical renovation and new-work projects across Virginia.

Public school PV and metering coordination.

Dominion Energy / utility coordination support for school electrical infrastructure.

Electrical service upgrade concepts for welding lab renovation work.

NOVEC coordination and load impact explanations for new independent electrical services.

Fire alarm, security, data, access control, and low-voltage coordination for renovation projects.

Panelboard, feeder, transformer, lighting, controls, and equipment connection coordination.

RFI and submittal review for school and public-sector projects.

Punch list and field observation support.

Owner-facing electrical load summaries.

Church and Nonprofit Media Projects

Third Street Bethel AME worship media support.

Church bulletin, livestream, and digital presentation coordination.

Spirit of Wealth Summit media guide and technology coordination.

Church media equipment upgrade support.

Flyers and visuals for church programs and community events.

Internal audit and trustee board documentation support.

Fraternity and NPHC Projects

Omicron Omega website support and redesign planning.

NPHC-MR website support.

Iota recruitment flyers and interest session decks.

Iota 102 leadership education.

PillarPhiX intake class support.

Nexus Center planning and grant-template support.

Professional development and resume support for younger brothers.

Chapter history preservation and website content strategy.

Scholarship and endowment communication support.

Community service tracking and event communication workflows.

Creative / Entrepreneurial Projects

LomnickPro branding and website work.

Resume, portfolio, and Canva website support for mentees and young professionals.

Flyers, social media graphics, pitch decks, and event visuals.

Lionheart memoir writing and editing.

Real estate investor education and property-related learning.

Community storytelling and professional biography development.

LEADERSHIP PHILOSOPHY

Joel's leadership philosophy centers on building systems that outlive his direct involvement. He believes leadership is not merely visibility or charisma; it is documentation, succession, accountability, emotional intelligence, and the ability to develop other leaders.

Core leadership beliefs:

Do the work in a way someone else can repeat.

Train a second and an apprentice.

Protect institutional memory.

Document decisions.

Develop younger leaders before titles become vacant.

Tell the truth without destroying relationships.

Keep optics professional because everything is screenshot-able.

Serve with both excellence and humility.

Use creativity as a serious leadership tool.

Build men, not just events.

Turn pain into structure, and structure into legacy.

PRINCIPLE ALIGNMENT

Scholarship

Electrical engineering education, PE Power study, NSBE leadership, STEM mentorship, professional development, career coaching, and chapter education.

Leadership

Project engineering, Vice Polaris service, church governance, media ministry leadership, mentoring programs, NPHC-MR webmaster work, and chapter strategy.

Citizenship

Community service, church service, NPHC social action, youth mentoring, scholarship support, public-facing cultural work, and Richmond-area community engagement.

Fidelity

Intake compliance, chapter trust, church audit service, responsible communication, documentation culture, and stewardship of sensitive relationships and institutional reputation.

Brotherhood

Iota Phi Theta leadership, mentoring younger brothers, supporting OOYP, chapter succession planning, NPHC relationship-building, and lifelong commitment to uplifting men across generations.

PROFESSIONAL AFFILIATIONS AND MEMBERSHIPS

Iota Phi Theta Fraternity, Incorporated

Omicron Omega Chapter, Richmond, VA

Gamma Eta Omega Chapter, Henrico / Richmond area history

Pi Omega Chapter, New York City initiation

National Pan-Hellenic Council of Metro Richmond

Webmaster / Iota representative support

National Society of Black Engineers

RIT chapter alumnus and former student leader

Third Street Bethel AME Church

Media Team / Trustee / Internal Audit / Young Men's Mentoring Program

Break It Down RVA

Line dance community participant and ambassador

Greater Richmond Real Estate Investors Association

Real estate investor education and networking

African drum and dance communities

Bush Mango, Bata con Pies, EBA Dance Theatre, Ezibu Muntu, Akoma de Gado

SELECTED STRENGTHS

Electrical design thinking.

Systems thinking.

Plain-language technical communication.

Owner and architect communication.

High emotional intelligence.

Community credibility.

Visual storytelling.

Creative problem solving.

Leadership development.

Mentorship.

Cultural fluency.

Meeting documentation.

Fraternity operations.

Website and graphic design.

Public speaking.

Strategic planning.

Faith-rooted service.

Resilience under pressure.

Intergenerational leadership.

Ability to translate between technical, community, church, and fraternity environments.

MASTER CAREER NARRATIVE

Joel Maurice Lomnick's career is not a single-lane engineering story. It is the story of a technically trained electrical engineer who became a systems builder across multiple worlds.

At RIT, Joel learned how to survive academically rigorous electrical engineering work while also leading in NSBE, gospel music, radio, student life, STEM outreach, and cultural programming. That early combination of technical skill and community leadership became the foundation for his adult career.

After graduation, Joel entered engineering through early technical roles in Rochester, developing practical design, documentation, and workplace experience. In Albany and Troy, he expanded into consulting engineering, corporate engineering, business education, church leadership, music management, African drum and dance instruction, mentoring, and eventually Iota Phi Theta leadership. He earned an associate

degree in business administration, passed or held EIT status, and learned how to navigate professional environments while building community outside of work.

In Richmond, Joel rebuilt his life and professional identity. Through 2RW Consultants and later Richmond-area engineering roles, he built Virginia-based building systems experience. At Ascent Engineering Group and Stratus, he matured into a project engineer supporting real public-sector, education, renovation, and community infrastructure projects. He became known not only for technical work, but for clarifying complicated electrical issues, supporting project managers, writing concise responses, and making technical topics understandable.

At the same time, Joel became a major builder in Omicron Omega Chapter of Iota Phi Theta, Third Street Bethel AME Church, NPHC-MR, and local creative communities. He brought the same engineering discipline to chapter systems, church media, mentoring programs, websites, graphics, flyers, scholarship messaging, professional development, and public-facing community communication.

Through Lomnick Professional Services and Olunirun Enterprises LLC, Joel's long-term vision is to build a professional platform that combines engineering logic, creative storytelling, brand strategy, community development, mentoring, and practical consulting. His career path demonstrates a rare combination: technical credibility, cultural fluency, leadership depth, creative execution, and a sustained commitment to helping people and organizations become more visible, organized, and effective.

EARLY LIFE AND CHARACTER FOUNDATION

Joel was born in Rochester, New York, and developed early through family complexity, academic drive, church formation, STEM access programs, athletics, student leadership, and cultural expression. His high school years at Edison Technical and Occupational Education Center included engineering exposure, chess, yearbook, student government, National Honor Society, track and cross-country, Rochester Engineering Exploratory Program, and early work experience.

That foundation shaped a professional who is analytical, observant, adaptable, and persistent. The same traits that helped him survive demanding academic and personal environments now support his work as an engineer, mentor, strategist, designer, and leader.

HOBBIES AND PERSONAL INTERESTS WITH PROFESSIONAL VALUE

Writing and memoir development through Lionheart.

Website design and digital branding.

Graphic design and visual storytelling.

Resume and career coaching.

Mentoring and life coaching.

Real estate investing education.

West African drum and dance.

Line dancing and movement-based wellness.

Gospel music and church media.

Public speaking.

Leadership development.

Community history and chapter archives.

Professional development for young Black men.

Personal finance, self-improvement, and long-term legacy planning.

MASTER RESUME NOTE

This resume is intentionally comprehensive. For a job application, it should be cut down depending on the audience:

For engineering roles: emphasize Stratus, Ascent, technical skills, project delivery, EIT, education, construction management, and code coordination.

For leadership or nonprofit roles: emphasize Iota, NPHC-MR, Third Street Bethel AME, mentoring, LomnickPro, NSBE, and program development.

For creative or communications roles: emphasize LomnickPro, websites, graphic design, Lionheart, social media, church media, public speaking, and storytelling.

For executive/community leadership roles: emphasize the full intersection of engineering, organizational leadership, community trust, digital strategy, and mentorship.
