ELECTRICAL ENGINEER | PROJECT ENGINEER II |
CREATIVE STRATEGIST | COMMUNITY BUILDER

📍 Richmond, Virginia

✉️ joel.lomnick@gmail.com

Dear Hiring Manager, Search Committee, Selection Committee, or Community Partner,

I am a multidisciplinary professional whose work sits at the intersection of electrical engineering, project delivery, community leadership, mentoring, creative strategy, and cultural work. My career has been shaped by the belief that technical excellence and human-centered leadership are not separate pursuits—they strengthen one another and create meaningful impact.

I hold a Bachelor of Science in Electrical Engineering from **Rochester Institute of Technology**, an Associate of Science in Business Administration from **Hudson Valley Community College**, and a Construction Management degree from **San Joaquin Valley College**. I hold the Engineer-in-Training credential and continue pursuing growth through PE Power licensure preparation, business administration study, and construction management coursework.

I currently serve as a Project Engineer II / Electrical Engineer at **Stratus**, where I support the delivery of K-12, institutional, and public-sector projects. In this role, I contribute to electrical design, coordination, construction documentation, RFIs, submittals, and consultant/client communication. I take pride in turning complex systems into clear direction and helping teams move projects forward with order, clarity, and trust.

My philosophy is simple: engineering is service. It is communication. It is stewardship of people, resources, and public trust. Whether I am coordinating technical work, mentoring emerging professionals, or supporting mission-driven organizations, I aim to leave the work clearer, stronger, and more useful than I found it.

JOEL MAURICE LOMNICK, EIT

ENGINEER • ENTREPRENEUR • LEADER • COMMUNITY BUILDER

Project coordination and clarity. I support cross-functional teams by organizing scope, documenting decisions, tracking risk, and translating technical information into clear summaries for stakeholders. My strength is helping complex work stay aligned, accountable, and understandable from concept through closeout.

Lomnick Professional Services / LomnickPro. Through LomnickPro, I help people and organizations present themselves clearly and professionally through resumes, cover letters, websites, presentations, brand storytelling, and public-facing communication.

Iota Phi Theta Fraternity, Incorporated. As a member of Iota Phi Theta, I live our foundational principles—Scholarship, Leadership, Citizenship, Fidelity, and Brotherhood—and have served in alumni, intake, mentoring, and regional support roles focused on succession, development, and community impact.

Third Street Bethel AME Church. Through church service, especially media and communication support, I contribute organization, clarity, and excellence to ministry work while encouraging growth and responsibility in others.

NSBE and mentoring. My leadership foundation was strengthened through the National Society of Black Engineers at Rochester Institute of Technology, and I continue to mentor students, young professionals, and emerging leaders with an emphasis on technical confidence, character, and purpose.

Author and storyteller. I am the author of the *Lionheart* memoir project, a body of work exploring family, faith, engineering, identity, reinvention, and the unfinished work of becoming. Writing has strengthened my ability to communicate with structure, clarity, and meaning.

Cultural work and community. Through West African drum and dance, line dance community spaces, and broader cultural engagement, I help build connection, discipline, rhythm, joy, and belonging.

Entrepreneurship and long-term growth. My interests in real estate education, business building, and Olunirun Enterprises LLC reflect a long-term commitment to creating opportunity, strengthening communities, and building work that lasts.

A bridge between systems and people. Across engineering, entrepreneurship, faith, and the arts, the thread remains the same: I build bridges between systems and people, ideas and execution, mission and results. I bring technical competence, communication, community impact, and ethical leadership to every partnership.

Thank you for your time and consideration.

Sincerely,

Joel Maurice Lomnick
